

Scientific Events

The objective of the ENP Scientific Events Program is to help the community to meet, create and maintain multidisciplinary exchanges in the broad field of Neuroscience. Symposia, colloquia, conferences and thematic schools give our members opportunities to contribute to national and international research.

Responding to an increasing need for sponsorship, the ENP meets scientists' requests in supporting their workshops and actual presence in large international symposia. As of today 35 events have already been supported by the ENP. In addition to this support, ENP organizes two scientific symposia each year: the ENP DAYS and the ENP Thematic School.
